Subject: Senator Kamala Harris, Southern California Edison and PG&E

[Kamala Harris and PG&E.pdf](#)

[Democrat Harris Assault on Pruitt.pdf](#)

[Harris Attacking Pruitt.pdf](#)

Dear EPA Secretary Pruitt,

It appears that the former CA AG Kamala Harris who is now Senator Kamala Harris (who recently visited Oroville Dam) has basically helped utilities and their regulators in the past by warning them that they were coming so be prepared and by her inaction.

It appears in the past she put Southern California Edison and PG&E interest before the public interest by not following through on search warrants on the offices of utilities and regulators and inaction against PG&E to not help expose corruption.

Which was basically what SWRCB Bryan Elders did which allowed PG&E to change things around so it looked like everything was in order, cleanup the scene, fix maintenance and housekeeping issues, destroy evidence, tamper with evidence and remove evidence by allowing PG&E to completely remove the waste water and facility before he inspected it.

Plus he basically refused to examine all the records, logs and manifest to help determine if there was a discharge or not from the facility and help determine if the waste water was being disposed of at a location not listed on the NOIs which is prohibited and appears to be the case with some of the waste water from the R-503 Gridley, Butte County Project.

SWRCB Officials George Low who was involved in permitting the R-503 Gridley Project gave Butte County DA Investigator Nick Moore very conflicting statements to what SWRCB Bryan Elders reported about where the waste water was being transported and disposed of.

Mr. Low basically said that none of the R-503 Gridley Butte County waste water was transported outside of Butte County to Sutter County which contradicts what SWRCB Bryan Elders basically reported about some of the waste water being transported outside Butte County, to Sutter County and Yolo County and disposed of which is at a location not listed on the R-502 Live Oak, Sutter County NOI and not listed on R-503 Gridley Butte County NOI. The R-503 NOI basically states that discharging / disposing of the waste water at another location not listed in the NOI is prohibited but that is exactly what PG&E was doing with some of its waste water.

It's the Gov. Brown Democrat Controlled Government Agencies / Cal/EPA / SWRCB who has authored false / misleading reports which has allowed PG&E to get away with violations so Senator Kamala Harris and the California Democrats / Liberals shouldn't be pointing fingers at President Trump and EPA Secretary Pruitt especially when you examine the corruption that has been involved in with the energy / utility companies PG&E and Southern California Edison.

There needs to be a Federal Investigation into the relations between California Democrats, California Agencies, Gov. Brown, Senator Harris, and PG&E because they are all corrupt and dishonest according to many news reports.

How can you trust these people / agencies with Oroville Dam and Federal Funds when they are all corrupt and dishonest according to many news reports?

Sincerely- Will Rogers
